

## Warranty & Cabinet Care

Providing people with a good product is one thing.  
Giving them the best is something entirely different.  
That's the Decor Difference.

### Warranty

- Warranty only covers products supplied from the Decor Cabinet Company to the original purchaser or homeowner.
- All products are warranted to be free of defects in material and workmanship for a period of 5 years.
- Hinges and drawer tracks have a manufacturer's lifetime warranty.
- This is a limited warranty that covers only the repair or replacement of defective material or parts.
- This warranty does not include wood products shipped unfinished, misuse, abuse, improper storage, neglect or improper installation and does not include removal, shipping, or reinstallation on any items or products.

### Wood Finishing

- The Decor Cabinet Company uses only the finest finishing materials available.
- After a final hand sanding, all wood products are inspected for imperfections.
- Toners are used where necessary to even out any natural wood variations.
- Furniture stains are applied and hand-wiped to bring out the natural beauty of the wood.
- A catalyzed sealer is applied to seal the wood from moisture.
- The product is hand-sanded and given a final inspection before the topcoat is applied.
- To provide the best possible protection, a satin topcoat of catalyzed varnish is applied.
- All finishes provided by the Decor Cabinet Company are easy to clean and resistant to most household chemicals.

### Wood Characteristics

- The Decor Cabinet Company uses only the finest kiln-dried hardwoods.
- Because no two pieces of wood are exactly the same, there may be slight variations in color. The differences in the grain and patterns add to the natural beauty of solid woods and veneers.
- All hardwoods may contain some pin knots, which add to the natural beauty of the wood.
- Cherry and maple occasionally have mineral streaks that may become darker when stained.

### Product Change

- In keeping with our policy of continuous product improvement, the Decor Cabinet Company reserves the right to alter specifications without general notice.
- The Decor Cabinet Company will not be responsible for making these changes in products shipped prior to the change.

### Cabinet Care

**Cleaning** - The following instructions apply to all wood, melamine, laminate and painted surfaces.

**For regular cleaning of all door and cabinet exterior and interior surfaces:**

- Wipe with a damp soft cloth, then dry with another soft cloth.
- Always wipe in the direction of the wood grain.

**For thorough cleaning of your cabinets you can do the following:**

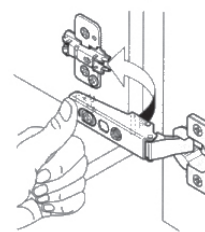

- For wood doors and surfaces use a non-wax based cleaner that is designed specifically for wood cabinets and woodwork, or use mild soap mixed with water, rinse well and then dry with a soft cloth. Lemon oil also works, but it will leave the surface oily to the touch.

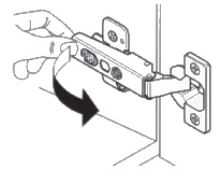

### Cabinet Care Continued...

- For painted doors and surfaces, use a cleaner that is designed for painted wood cabinets and woodwork, mild soap and water or a diluted vinegar and water solution (rinse well).
- For melamine or high pressure laminate doors and surfaces use the above methods. For stubborn stains use a damp soapy cloth, rinse well to remove all soap residue and dry with a soft cloth.
- All Decor cabinets have clip-on hinges that allow easy removal of the doors (see diagram to the right). This provides greater access to the cabinet interiors to give them a thorough cleaning.

### General Care

- Never use detergents, strong soaps, abrasives or waxes. They can damage the finish or leave a residue that air borne grease will stick to.
- Do not wipe cabinets with a dishcloth. A dishcloth can contain soap, grease and other soil that can damage the finished surface of the cabinets.
- Excessive moisture is the enemy of any finish or wood product. Do not allow water or other liquids to be in contact with outside or inside surfaces for prolonged periods of time.
  - o This may eventually dull the finish and stain melamine interiors.
  - o It may absorb into the wood core of the veneer toe-kick or end panels and start to swell.
- Avoid steam from kettles, etc., being directed at the underside of cabinets or bottom edge of doors. This may eventually affect the adhesion of the edge banding and may also dull the finish.
- Treat Decor cabinets as you would any other piece of fine furniture and they will reward you with long lasting beauty.
- Scratches and nicks can be eliminated or hidden by using a touch-up color marker on shallow scratches, or by using a matching wood-tone putty stick on deeper scratches or nicks. These areas can then be blended with surrounding areas using a light coat of wax. Touch-up markers and putty sticks are available from your local Decor Cabinet Company dealer.
- Finish can wear off on the cabinet doors used the most often, due to home owners not using the handles on the doors and drawer fronts. Over time, the oil from your hand will break down the finish.

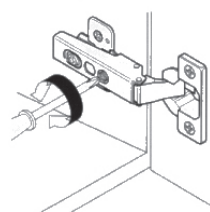

### Adjustments

- Your Decor cabinets are equipped with 3-way adjustable hinges. Over time you may notice your doors are no longer perfectly aligned, but this is easily fixed. To the right is a diagram with detailed instructions on how to perform these simple adjustments.
